

Emergency Child Care Bridge Program

Module 3: Identifying Childhood Trauma

About the Training:

This training builds on the concept of trauma-informed care as it helps providers identify trauma behaviors in young children. Providers will learn about explicit and implicit memories as well as normal stress responses in children. Specific examples of dysregulated behaviors will be provided and strategies to create a safe environment for children will be discussed.

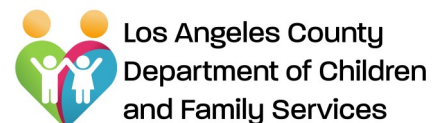

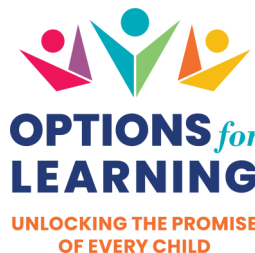

Trauma-Informed Care Training

For Providers

Thursday– 09/01/2022 @6pm-8pm
ZOOM-Virtual Training

RAFFLE PRIZES : Offered in every session! Must be present **AT THE END** of the training to win.
